

Complete Streets Plan

A Complete Streets Plan identifies solutions to create a transportation network that considers all users. A complete street make it easier for people to walk, bike, and use public transportation, while also enhancing community aesthetics and supporting economic growth. Complete Street plans are developed with the specific community context in mind.

Overview

A Complete Streets Plan

- Provides a summary of existing conditions
- Engages the community and stakeholders
- Proposes detailed recommendations based on data analysis and community outreach
- Prioritizes recommended projects
- Identifies implementation steps and potential funding sources

Benefits

Complete Streets help create livable communities for all users of streets, including children, people with disabilities, older adults, and those without a car. Complete Streets improve equity, safety, and public health, while reducing transportation costs and traffic woes.

HOW? Through the Transportation Planning Grant program, your community will be paired with a TDOT Long Range Planning Division on-call consultant. The community is responsible for participating in the plan through establishing a Steering Committee and ensuring local support for the study recommendations. The CMP focuses on all modes of transportation to develop targeted recommendations for future implementation.
